

CVSTOS

THE TIME KEEPER

Press release

May 2021

SEALINER PS

True to CVSTOS' pioneering design, the Sealer overturned existing expectations by introducing an ingenious nautical style. The latest interpretation of this iconic collection is the new Sealer PS. A combination of inimitable signature features that underscore a timepiece simply incomparable with any other on the market.

Technical sophistication and teak wood create an unmistakable identity

Directly inspired by the propeller of a motor yacht, the small second indicator interplays with the transparency of the skeletonized calendar disc displaying the date through an aperture at 6 o'clock. Beneath the Super-Luminova coated dauphine hands that match with the beveled hour markers, the sophisticated dial captures a high-tech parade of bridges and plates overlapping the refinement of CNC processed inlaid teak wood.

The open caseback unveils the complex arrangement of the CVSTOS CVS410 caliber. Housing a high-density Tungsten alloy rotor, this self-winding mechanical movement beats to the rhythm of 28,800 vibrations per hour.

Introducing the new CVSTOS Azure Blue tint

Crafted in steel, 5N rose gold, or two-tone combination, the case is also available coated in classical Navy Blue or in the new CVSTOS Azure Blue tint with its luminous hues.

Revealing new perspectives through sapphire crystal porthole apertures

Polished and satin-finished, the tonneau shaped case asserts its strength and identity through the purity of its lines and the geometrical harmony of its curves. The additional engravings recall nautical patterns and four sapphire crystal porthole apertures positioned on the lateral side of the case draw the eye's attention to the working of the movement from an unexpected angle.

A yacht for the wrist

Fitted with a screw-down crown designed according to the model of a yacht's deck filler cap, the case is water-resistant to 100 meters. The Sealer PS is to be worn with a rubber or alligator leather strap featuring a folding clasp.

Powerful streamlined design engineered by CVSTOS

Speed, power, and elegance underline this exceptional timepiece, where the aesthetic codes of mega yachts and streamlined design converge to form a bond that will propel the CVSTOS Sealer PS towards new horizons.
