

CVSTOS JETLINER PS CARBON

Lightweight engineering, maximum impact

Cvstos unveils the Jetliner PS in layered carbon, a bold expression of technical craftsmanship and contemporary design. Inspired by the aeronautical world, the timepiece features a distinctive tonneau-shaped case constructed from advanced layered carbon, offering exceptional strength while maintaining an ultra-light weight of approximately 60 grams for the entire watch with the strap.

Built for motion, styled for performance

Enhancing its dynamic character, the Jetliner PS is now paired with a new high-performance textile strap, reinforcing its sporty identity while ensuring superior comfort and durability. This contemporary strap option complements the watch's lightweight construction and active lifestyle appeal.

Where mechanics become a visual experience

The Jetliner PS showcases a skeletonized dial that reveals the intricate mechanical architecture within, emphasizing both transparency and precision. Its dynamic lines and high-performance materials echo the aesthetics of modern aviation, while ensuring optimal comfort on the wrist.

Powered by a self-winding mechanical movement, the watch delivers reliable performance and refined finishing, embodying the brand's dedication to innovation and Swiss watchmaking excellence.

Technical Data

Case Tonneau-shaped, 53.70mm X 41mm

Material Carbon with black Titanium Components

Caseback Open with sapphire crystal

Crystal Sapphire none-reflecting coating

Water-resistance 50 meters

Screws Polished black Titanium

Crown Screw-down, polished black Titanium with rubber insert

Hands Pierced and Super-Luminova treated

Calibre CVSTOS 410 automatic winding

Functions Hours, Minutes, Small Second

Power-reserve 42 hours

Jewels 31

Frequency 28'800 vibrations per hour

Bracelet textile with Velcro fastener or rubber strap

Swiss made
