## THE METROPOLITAN COLLECTION

***Once again Cvstos has soared to new heights in the vibrant independent watchmakers' panorama. Offering a beautifully balanced design, the Metropolitan collection is certain to set the trend for the future as the emblem of a new watchmaking era. Crafted in Grade 5 titanium, 5N red gold, or a fully transparent sapphire crystal, these desirable models embellish time with an urban chic dimension.***

### ***A capsule collection of limited editions***

A contemporary expression of watchmaking art embodied in a capsule collection, the Metropolitan is a curated line that welcomes two distinctive models: The Petite Seconde and the Chronograph. An ideal blend of horological traditions and modern styling, these timepieces appeal to connoisseurs and collectors who appreciate strictly limited editions presenting timeless perfection.

### ***Sturdy yet light***

Combining sleek lines and geometrical harmony, the distinctive tonneau-shaped case reveals the strength of an accomplished architectural edifice. Its understated elegance is reinforced by the interplay of polished and satin-brushed finishes that accentuate the dynamics of the Metropolitan case. The skillfully sculpted patterns of the bracelet's links create a perfect match with the case's highly refined finish and ensure optimal comfort. Featuring a tool-free interchangeability, a patented system, activated by a single push-piece integrated behind the lugs, enables an easy swap between the bracelet and the rubber or alligator leather straps.

### ***Visual fascination***

The Metropolitan PS model offers two radically different faces to time: The version endowed with an open dial unveils a state-of-the-art uber skeletonized self-winding movement. Developed and manufactured in-house, the pierced main plate and the bridges demonstrate Cvstos' watchmaking know-how and offer a view on the movement's staggering arrangement. The second version is distinguished by a dial developed and manufactured entirely in the Cvstos' workshops located on the outskirts of Geneva. An exclusive in-house diamond polishing process, brings remarkable precision and unparalleled shine to the guilloché pattern which is divided into two distinct zones surrounded by applied indexes. Fitted with a mechanical self-winding movement featuring a column-wheel, the Metropolitan Chronograph displays its functions on a sunburst dial with snailed counters that enhance legibility.

### ***New perspectives for authenticity***

When it comes to limited editions, the mastering of trackability is most essential. Visible through the sapphire crystal caseback, an individual QR Code is directly engraved on the rotor. Once registered, the information provided by the QR code vouches for authenticity and guarantees a state-of-the-art timepiece servicing through a global network of authorized Cvstos retailers.
